

CRYPTO FC

DECENTRALISED SPORTS BETTING

OFFICIAL WHITEPAPER

ABSTRACT

Brought to you by **passionate football fans** and avid gamblers - **Crypto FC** is a decentralised sports betting platform launched on the **Binance Smart Chain (BSC)**. **The Crypto FC** ecosystem currently consists of our all new implemented system of pumping your bag for you! Through our community vote feature the community decides on a fixture to **gamble** the buy tax on, if the chosen team wins we will pump the graph by using the winnings to buy back tokens. The **gambling** industry is valued at an estimated **\$565 Billion in 2021** with the online **sports gambling market** making up **\$194.63 Billion** of it.

Therefore, the need for a **decentralised sports betting** platform is essential. The decision to launch on the BSC chain was made due to the high congestion on alternate blockchains such as Ethereum causing gas fees to be upwards of \$15 for a simple transactions whereas, BSC has an average transaction cost of \$0.19. We believe that with lower fees it will allow for more people to get involved causing for the ecosystem to thrive. We believe that **gambling** should be easy to access for everyone on the crypto platform, without the need for a **KYC** so that you can keep your anonymity.

INTRODUCTION

Sports have been intertwined with recreational activity for humans since the beginning of time, **gambling** has been in the same category and has long been affiliated with **sports**, so we the dev team decided that we should make a token which will thrive from this **golden duo**.

A recent 2021 study has shown that the **gambling** industry currently sits approximately around **\$565 Billion** and is projected to reach a revised size of **\$876 Billion by 2026**, with the global online **gambling** industry projected to be worth more than **\$265 Billion** in the same time period.

FAQ

Why is the team anonymous?

Due to the Nature of the product being related to **gambling** which is not legal every where, the team has chosen to stay anonymous. However, we do plan to third party Kyc and **AMA's** to show as much transparency as possible.

How do I know the token is safe?

The Token has been created by Pinksale SAFU developer **@Trynos** under Pinksale SAFU conditions. We're now being KYCd and audited by **Cyberscope**.
